■ Experience

Lendable

Software Engineer

September 2021 - ongoing

Lendable is a UK's fintech unicorn. Working in Autolend team on hire-purchase loans automation.

Synapsees

Go Developer

December 2018 - October 2019

Team Lead and Go Developer on a big data / IoT project. The biggest challenge was crunching big amounts of data in real-time while not letting the UX suffer.

Tech Stack: Go, Postgres, TimescaleDB, RabbitMQ (MQTT Protocol)

Mobile Guardian

PHP Developer & Tech Lead

November 2017 - September 2021

Mobile Guardian is the leading mobile device management platform since 2014. I worked on maintaining and moving the product forward while at the same time refactoring / re-writing the legacy codebase.

Tech Stack: PHP/Laravel, MySQL, Redis

JSGuru

Software Engineer

November 2017 - September 2021

Working for our clients Mobile Guardian and Synapsees, as well as in-house projects like developing and maintaining the PHP SDK for a Headless CMS. Helping out the sales team in a technical advisory role.

■ Education

University Of Banja Luka - Faculty Of Economics

Auditing and accounting module

September 2009 -

Grammar School

September 2005 - June 2009

Elementary School "Aleksa Šantić"

September 1997 - June 2005

Tools & Approaches:

Domain Driven Design, Test Driven Development, Docker, JetBrains IDEs, XCode

Operating Systems:

Centos, Ubuntu, macOS, Windows

Navigo SC

Full Stack PHP Developer

June 2016 - November 2017

Building an accounting web service from scratch for a niche specific to my country.

Tech Stack: PHP/Laravel, MySQL

Bitlab d.o.o.

Full Stack PHP Developer

April 2016 - June 2016

In the brief period I worked here I was mainly connecting views with domain logic in Laravel.

OGO Sense

UX Design Intern

February 2016 - April 2016

Two month internship in design with focus on UX. The whole process from wireframes to complete website/app desing in Adopbe Photoshop. In addition website design implementation in Joomla. [Certificate](#)
